Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-7 and 10, drawn to a method of issuance of a convertible note,

classified in class 705, subclass 35.

II. Claims 8 and 9, drawn to a method of issuing synthetic capital stock,

classified in class 705, subclass 36R.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as it can be used for issuing medium term convertible notes which are associated with an enhanced coupon or dividend rate. In the instant case, subcombination II has separate utility such as it can be used for issuing synthetic capital stock. See MPEP § 806.05(d).

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Jay Cinamon on August 16, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.
